

# Skid Mount Pretreatment Systems For Brewery Water

**Pure Water Technology** offers pre-engineered turnkey brewery water pretreatment systems. Full welded aluminum skid protects the filtration tanks from accidental damage. Each system is delivered fully assembled. Water inlet/outlets are terminated in 1" flanges and are ready for easy 4 bolt connection to a water source and your brew house. We can accommodate a variety of flowrates. Models available in 15 GPM increments. See rear for sizing chart and optional features.

## Features:

- Pre-plumbed in industrial grade Schedule 80 PVC
- Filters are housed in 8" x 40" fiberglass tanks
- Convenient top loading design facilitates filter changes in < 5 min
- Filters have an integrated lifting handle for easy removal
- Dual gradient sediment filter with 20 micron string wound exterior and a 5 micron melt blown polyester core
- Each 3 micron carbon filter can de-chlorinate 250,000 gal @ 15 GPM
- Multiple carbon filters can be plumbed in parallel for higher flowrates
- Aluminum wall mount panel for instrumentation and flow control
- Inlet/outlet pressure gauges for each filter display filter performance
- Flowmeter with integrated throttle restricts flow rate to each carbon filter to 15 GPM to ensure proper contact time and de-chlorination
- 5 micron post treatment filter to capture any residual carbon fines

## Optional Features:

- Ultraviolet light for disinfection
- Anti-scale systems for boiler make up water
- Digital gallon totalizer
- Specialized filters for chloramine removal

# Skid Mount Pretreatment Systems For Brewery Water

Model #	SK-15	SK-30	SK-45
De-chlorination rate	15 GPM	30 GPM	45 GPM
Qty. sediment filters	1	1	1
Qty. carbon filters	1	2	3
Qty pressure gauge	4	6	8
Qty. flow meters	1	2	3
Total filter capacity	250,000 Gal	500,000 Gal	750,000 Gal
Inlet connection	1" Sch 80 Flange	1" Sch 80 flange	1" Sch 80 flange
